

THE EDUCATORS' CENTER OF LAKE COUNTY

The Educators' Center works to:

- Provide a place to obtain high quality, research-based information about teaching and learning;
- Provide an ongoing assessment of professional development needs in the region via bi-annual surveys of superintendents, principals and teachers;
- Provide professional development of pre-K-12 teachers and administrative staff through workshops and seminars, as well as academic programs leading to advanced degrees and additional approvals/endorsements;
- Help prepare teachers and administrators to be agents for change within their schools; and
- Contract with specific school districts to deliver tailored professional development that addresses a district-identified need with the resources of University Center member institutions.

Customized Work with Schools

The Educators' Center works with schools and school districts in Lake County to assist in grant-writing and partnering, finding appropriate educational consultants through the University Center member institutions, and matching appropriate member institutions to provide specifically tailored contract solutions to professional development needs.
