REQUIRED COURSES:

IT 486	Web Design for Instruction
IT 505	Needs Assessment and Program Evaluation in Instructional Technology
IT 510	Instructional Systems Design
IT 567	Online Teaching Tools
IT 568	Design and Development of Online Lessons, Modules, and Courses
IT 569	Facilitating Online Classrooms

This certificate offers students an opportunity to gain expertise in the areas of designing and developing web-based learning environments within corporations, non-profit organizations, healthcare, higher education, and K-12 education.

The curriculum for the certificate program consists of two smaller credentials—a Professional Development Sequence (PDS) in “Instructional Design” and a PDS in “Online Pedagogy.” When, you finish the certificate, then, you will have earned a total of three credentials—two PDSs and the certificate.

The faculty members who teach the courses in this certificate program have practical experiences designing curriculum for middle schools and high schools. Faculty members also have experiences working in major corporations, like Anheuser-Busch, Time Warner Communications, and A. G. Edwards. Therefore, students receive practical knowledge and experiences that will equip them to deliver web-based learning interventions for the 21st Century.

ADMISSIONS:

- 2.5 undergraduate GPA or higher
- Bachelor’s degree
