University Center Names Joseph R. Kane Director of Technology & Business Development

The University Center of Lake County has named Joseph R. Kane to the position of Director of Technology & Business Development effective November 17, 2008. Kane, a Lake Villa resident, is currently a managing consultant for Delta Initiative in Palatine. He brings a background in technology, strategic planning, and building business relationships.

"We are very pleased to add Joe Kane to the University Center team in this important new position," said Executive Director and Dean G. Gary Grace. "While the University Center has been expanding its academic offerings over the past few years it has also been quietly developing a reputation as the first choice in Lake County for hosting effective business meetings, training sessions, and strategic planning retreats, especially

those with challenging technology requirements. We are now poised to take the next step in our workforce development initiative by supplying content as well as space. Joe Kane will lead us in this effort to bring the resources of our 18 member schools to bear to help meet workforce needs in Lake County.”

Prior to his consulting career, Kane held a series of positions at Hewitt Associates over more than fifteen years, ultimately serving as Director of Application Development - Enterprise Systems. He holds an MA in Human Resources and Human Relations from Webster University, a BA in Philosophy from Marquette University, and is a graduate of DePaul University’s Computer Career Program. He is a member of the Society for Human Resource Management, the Technology Leaders Association, the Human Capital Management Institute, and the Evans Scholar Alumni Association.
